Prosthetic Management of Implants in the Esthetic Zone

PROGRAM:

Oral rehabilitation is a subtle blend of art and science in which aesthetic and functional goals overlap in a diffused way. In the process of achieving these objectives, it is necessary that the dentists know and master certain techniques that allow them to reach his destination.
Key factors: Planning and managing of the aesthetic determinants, the pink white balance, the provisionalization.
The design of the definitive prothesis requires a thorough study and a simple protocol.

Schedule 10:00 to 15:00 h.

a) Introduction to implantology and to the Klockner Implant System.

b) Diagnostic factors in implant dentistry.

c) Factors affecting aesthetic outcomes:
Surgical and anatomical factors and prosthodontics factors.
1. Restoration driven treatment plan.
2. Provisional Restoration
3. Implant prosthesis abutment connection.
4. Definitive abutment type and materials.
5. Final restoration design and materials.

d) Management of single and multiple cases.
